

There are certain evenings in Cappadocia when the light softens on the rock, the wind blows through the vineyards, and time slows down... This is precisely the feeling that Zemi Hotel Cappadocia offers Istanbul and Bodrum's elite event agencies for the 2026 summer season: an understated yet powerful, tranquil yet impressive setting. Your guests will not be attending an 'event' here; they will be experiencing a carefully crafted memory.

Zemi's luxury is not expressed in loud words; it lives in a rhythm that is quietly felt in the details. The tempo of the welcome, the smooth flow of service, the way the spaces connect to each other... All these small elements make big nights seem effortless.

Our open spaces

Our open space concept offers a flow that can transform into different moments within a single day: a welcome cocktail, sunset ceremony, gala dinner and after party... Moreover, these transitions are experienced not as a 'change of venue' but as the natural flow of a single story.

Green Garden – 250 people: Ideal for elegant wedding dinners, brand events and garden party concepts; a green backdrop that always looks good in photographs.

New Garden – 200 people: More boutique, more exclusive; a strong alternative offering a “private” feel for select groups.

Poolside – 1,500 people: A space that carries the stage/lighting/flow concept for large-scale events, adding dramatic depth to the evening.

Country Garden – 1,000 people: Spacious layout, generous seating plans and a strong foundation for large weddings; suitable for festival-style concepts.

Private Vineyard & Bar – 250 people (cocktail): Within the hotel grounds, more intimate and characterful; a signature spot for receptions, VIP meetings and after parties.

For us, luxury is not just about décor; it's about the smooth running of operations. Without an approach that understands the pace of the agency team and the “must-haves” on the ground, true luxury cannot emerge. That's why we have one goal throughout the process: to take the pressure off the field on your behalf.

Experienced event and F&B manager Ahmet Etçioğlu, as the hotel's new General Manager, brings speed and clarity to the entire process, from proposal to implementation, with his approach that understands the needs of agencies on the ground. This makes a clear difference, particularly in VIP guest management, service rhythm and the reflex to produce last-minute solutions.

Working style for agencies

In high-end projects, being “good” is not enough; consistency is required. That is why we adopt the principles of clarity and speed in our communication with our business partners:

- A brief briefing: date, number of people, concept language and target guest profile.
- Space-flow proposal: structuring open spaces in the right order according to the rhythm of the day.
- Food and beverage approach: an elegant and sustainable menu flow that does not disrupt the service tempo.
- Implementation day: single command on site, invisible coordination, guest-focused solution reflex.

If you wish, we can also convey the spirit of Cappadocia in a more “signature” language: an elegant welcome in the vineyard, a musical language that settles into the sunset, the right tempo as the night progresses... When your guest leaves, they won't just say “it was beautiful”; they'll say “it was very well thought out”. This is the most valuable sentence for the agency.
